

Blessing Adeleke

MOBILE DEVELOPER | REACT NATIVE | SWIFTUI | KOTLIN | JAVA | FLUTTER

Highly skilled React Native and SwiftUI professional bringing enormous talents for software design, development, and integration. Detail-oriented, organized, and meticulous, working at a fast pace to meet tight deadlines. Offering advanced knowledge of in-demand React Native expertise, with additional proficiency in Kotlin, SwiftUI, and Flutter for native and cross-platform mobile development. Has a background of 6 years of experience writing code and developing seamless applications.

SKILLS

Languages & Frameworks: JavaScript/TypeScript, React, React Native, Swift, SwiftUI, Kotlin, Java, Dart, Flutter

State Management: Redux, Redux Toolkit, Zustand, React Context, Recoil

Backend & APIs: Node.js, NestJS, Express.js, GraphQL, Apollo Client, REST API, MongoDB, PostgreSQL, Firebase, Supabase, Firestore, Cloud Functions

Tooling & Testing: Git, GitLab, Bitbucket, JetBrains IDEs, CI/CD (CodePipeline, EAS Build, Expo Update), Maestro E2E, Detox, Appium, Nitro Modules

Other: Formik, React Hook Form, Agile methodologies, AI-assisted development (Claude, Codex, Copilot, Expo MCP servers)

EXPERIENCE

Senior Mobile Engineer (React Native)

I-Invest Oct 2025 – Present

- Developing advanced fintech features for a large-scale investment platform spanning Treasury Bills, Equities, Commercial Papers, USD Bonds, Mutual Funds, and Savings, with real-time portfolio tracking and performance insights.
- Built and enhanced KYC/onboarding systems, including document upload & verification workflows and digital signature integration.
- Developed core trading features: equities trading flows, watchlists, asset tracking, and interactive trading graphs with live market data visualization.
- Delivered an Asset-Backed Lending system allowing users to collateralize equities/fixed income assets, select loan tenor, and view repayment breakdowns.
- Collaborated with cross-functional teams to ensure compliance, performance, and scalability across financial products.

Lead Mobile Engineer (Runway) – FullStack

LaunchQ (TixTango) Aug 2026 – Present

- Leading end-to-end mobile architecture, feature deployment, and performance scaling for Runway, a next-generation logistics and delivery platform.
- Own monorepo governance and package boundary enforcement across shared React Native/TypeScript modules, with strict versioning and CI gating.
- Architected real-time delivery tracking with WebSocket-driven location syncing (Socket.io), background geolocation, and Mapbox/Google Maps SDK integration.
- Built Runway's MVP dispatch, navigation, and order-tracking flows using Redux Toolkit/Zustand and custom native modules (Nitro) for performance-critical processing.

Senior Mobile Engineer (React Native)

Nowpost Aug 2025 – Present

- Leading development of multiple production-grade mobile applications, delivering scalable, high-performance solutions in logistics and delivery systems.
- Built and optimized the Shopper App, focused on seamless UX, performance, and reliability across complex user flows.

- Leading development of the Driver App, including real-time order tracking with live location updates, and wallet/transaction features for driver earnings and payouts.
- Collaborated closely with backend teams to design robust APIs for real-time systems and financial transactions.

Senior Mobile Engineer (React Native & Expo)

ClickNSchedule Jan 2025 – Jul 2025

- Joined an in-progress project and significantly improved app architecture, code quality, and feature stability.
- Built real-time chat (Socket.io), profile editing, and custom onboarding flows; replaced third-party dependencies with custom country selector, phone input, and calendar range picker components.
- Applied scalable state management with Recoil, persistent storage via SecureStore, and optimized rendering in performance-sensitive screens.
- Contributed to the EAS Build release process, ensuring native features (camera, splash screen, Face ID) worked seamlessly across iOS and Android.

Senior React Native & Expo Specialist

HomeWise Jan 2025 – May 2025

- Built core functionality for an estate-focused mobile app enabling residents and executives to manage projects, polls, and community finances.
- Developed a dynamic live polls & voting system with real-time countdowns and multiple response options.
- Implemented estate project modules (contribution tracking, progress indicators, deadlines) and custom animated UI using react-native-svg and react-native-reanimated.
- Managed complex app state with Recoil for cross-component syncing and performance optimization; ensured high usability across onboarding, dashboard, and engagement features.

EARLIER EXPERIENCE

Senior Software Engineer (React Native) – Rise (May 2018 – May 2019): Improved app loading times by 30%, released 40+ updates within 2 months, cut bug resolution time from 24 to 15 hours per cycle, and mentored two junior developers.

React Native Developer – Smartract (Dec 2023 – Nov 2024): Reduced bug resolution time by 20%, boosted test coverage by 55% (Jest/Enzyme), achieved 99% code coverage with Redux/RESTful APIs, and improved load speed by 20% using CodePush for OTA updates.

Cross-Platform Developer – DreamLabs (Dec 2022 – Jun 2023): Cut user input errors by 64%, delivered a 40% performance boost, and maintained an 85% customer satisfaction rating.

EDUCATION

Electronic and Electrical Engineering — Obafemi Awolowo University, Ile-Ife, Osun State, Nigeria (Jan 2013 – Jan 2018)

LANGUAGES

English

AWARDS & CERTIFICATIONS

Mobile Developer

Google Africa Scholars

Harvard CS50: React Native

Conducted by Jordan Hayashi & David J. Malan

Stanford CS193p – SwiftUI

Conducted by Paul Hegarty

Built declarative SwiftUI interfaces using standard views, view modifiers, custom shapes, and GeometryReader, following MVVM architecture. Managed state/data flow with @State, @Binding, and environment objects; wrote safe async code with async/await and background queues; also covered data persistence, gestures, and animations.
